RealVision Inc.

RealVision makes the announcement about the technology alliance with Taiwanese Graphics LSI and board manufacturer XGI Technology

RealVision Inc.(Headquarter: Yokohama, Japan, C.E.O.: Naoshi Sugiyama) makes the announcement about the technology alliance with Taiwanese Graphics LSI and board manufacturer XGI Technology regarding the product development for Medical imaging and amusement equipments field.

Both companies are going to establish the technology cooperation scheme and provide the state-of-the-art products for above two application fields. RealVision's the Custom Graphics Technology which is the unique application specific technology based on both of hardware and software, and XGI's Graphics LSI and board development technology are combined and products competitive edge is strongly reinforced.

RealVision co-develops 3D Graphic LSI and board with XGI Technology and RealVision exclusively sales Graphic boards for medical imaging applications. Furthermore, RealVision co-develops 2D/3D Graphics LSI with XGI Technology and sales Graphics LSI for amusement equipment mainly for Pachinko and Pachislo applications bundling with SDK (Software Development Kit), driver software and dedicated OS.

As the first achievement of this technology alliance, RealVision is going to ship two types of 3D Graphics board series called VREngine/XMD for medical imaging applications in September for sample and in November for mass production.

Also in Amusement equipments fields, RealVision co-develops new products with XGI Technology to focus the higher functions and lower cost products for expanding market shares. RealVision plans to introduce new product to the market in first half of 2007.

Comment from RealVision's C.E.O. Naoshi Sugiyama :

"We have been providing boards and driver software specific for medical imaging applications. Recent growing electric medical record systems and LCD monitors requests us to develop the enhanced 3D graphic functions and color LCD monitor supports. We decide to join to XGI Technology who has the leading edge technology and a lot of experience to accelerate the product development." And Dr. Sugiyama also said "We decide to cooperate also in amusement equipment application fields to support customer's request more. We are really expecting the sophisticated 2D/3D Graphics LSI technology of XGI Technology."

Comment from XGI Technology's president Jonathan Shyi :

"XGI Technology is aiming the business expansion under the objective that enhances the business of 2D/3D Graphics LSI and board product for application specific fields. RealVision has long and rich market experience and have brought out expertise in medical imaging and amusement equipment application fields. We strongly believe RealVision is the best business partner for the business expansion of XGI Technology." And Jonathan Shyi also said "XGI Technology can contribute a lot for the enhancement of RealVison product

competitiveness and we have recognized this technology alliance is very important both for the company. I believe RealVision will be one of the biggest customer of XGI Technology.”
